Termite
resistant

On the deck with Blair Davies – Satisfied builder. Satisfied customers.

Robust, durable and easy to install, DURAWood® is a game-changer in fencing and decking solutions. When Blair Davies of Blair Davies Building tried it out recently, he was impressed, and so were his customers.

"I'd been on the lookout for a decent fencing and decking product for some time and DURAWood® caught my eye," reports Blair. "I decided to give it a crack and certainly wasn't disappointed!" So far, he's used DURAWood®

dual-purpose fibre cement products for fencing, decking, and even cladding for an outdoor storage structure – and he plans to continue using it.

"Providing you use the correct gear, DURAWood® is very easy to work with. I use a drop saw and have had absolutely no chipping when cutting or drilling. For fixings, I use stainless steel decking screws with an oval head, which I buy off the shelf at my local building supplies merchant. The stainless steel colour blends in perfectly with the natural colour of DURAWood®."

Blair reports that, without exception, his customers have been delighted with their completed DURAWood® projects. "I've secured new jobs through referrals from satisfied customers, including one from a passer-by who was so impressed, he asked me to price his job on the spot!"

He was also impressed with the ease of installation. "DURAWood® stays straight and stable from the get-go, and it looks great. Working with natural timbers always has its challenges with movement, warping and

cupping. Its durability is also an outstanding feature, as it's far more durable than any other fencing or decking alternative I've come across."

And how does DURAWood® compare when it comes to price? "DURAWood® really stacks up compared to natural timber and composite alternatives," says Blair. "My customers are generally surprised at how affordable a DURAWood® fence or deck is."

As Blair can attest, DURAWood® is a reliable, practical and cost-effective choice for all kinds of fencing and decking projects. Head to your local ITM or Mitre 10 Mega store to explore the long-lasting benefits of DURAWood®.
